NERC CIP

NERC CIP-015 (INSM)

05 TOP THREE EVALUATION CRITERIAVendors must address explicitly

1fasddsfCriterion 1

2sfdsfCriterion 2

3dssdfCriterion 3

PROTOCOL COVERAGE

Walk through exactly how your platform handles [specific protocol from our environment]. What function codes do you decode, and how was that coverage validated in a production environment?

PASSIVE DEPLOYMENT

If your sensor is deployed in passive-only mode with no active queries permitted, what capabilities are unavailable or degraded?

LEGACY ASSETS

What does your platform do when it encounters an asset it cannot identify or decode?

COMPLIANCE EVIDENCE

Show the exact evidence package your platform generates for a NERC CIP-015 audit. What format is it in, and has it been accepted by a NERC auditor?

PROFESSIONAL SERVICES

What is the minimum professional services engagement required to deploy and tune this platform in an environment like ours?
What is the typical timeline?

REFERENCE CUSTOMERS

Provide two reference customers in our industry who have been audited under our compliance framework and are willing to speak about their experience with your evidence package.
